

ASSESSMENT 2 BRIEF - Option 1: Industry Placement	
Subject Code and Title	ITW601 Information Technology - Work Integrated Learning
Assessment	<u>Option 1: Industry Placement</u> e-Journal - Industry Placement Interview and Project Synopsis
Individual/Group	Individual
Length	1,000 words (+/- 10%) Hours to be completed: 144 of 192 hours
Learning Outcomes	The Subject Learning Outcomes demonstrated by successful completion of the task below include: a) Critically evaluate a problem within the ICT body of knowledge, including appraising established theories and recent industry developments. b) Devise a structured inquiry-based ICT project relevant to professional practice with the use of appropriate principles and methods, and with a suitable level of personal autonomy and accountability. c) Communicate effectively in ways appropriate to the discipline, client, audience and purpose. d) Apply a systematic process of problem solving to identify and assess a real world need and propose an appropriate ICT solution to the problem. e) Critically reflect on personal and professional experiences to engage in independent development beyond formal education for lifelong learning.
Submission	Due by 11:55pm AEST/AEDT Sunday end of Module 9.
Weighting	35%
Total Marks	100 marks

Assessment Task

Write a 1,000-word (+/- 10%) Reflective Journal. This will be a project synopsis to provide a quick overview of your work for analysis by a stakeholder or project sponsor.

Please refer to the **Task Instructions** for details on how to complete this task.

Context

The main purpose of this subject is to prepare you for an industry job. Up until now, you should have a better understanding of what type of challenges a typical organisation faces in terms of their ICT infrastructure. Understanding those challenges and getting on top of them is one of the major takeaways of this subject. This will enable you to think more deeply on a technical level and ultimately will assist you in acing your industry job interviews.

Apart from this, understanding the challenges will also enable you to come up with your own ideas of creating a project that can take the shape of your project synopsis. A project synopsis is a document which contains the planned activities required for successful completion of a proposed project. It provides an overall view of your work for quick analysis by the competent authorities, e.g., business stakeholders or project sponsors.

This assessment should have the following elements:

- Include an account of what is required for your interview. Specifically, consider any professional standards in which you need to adhere to and detail any planning you have undertaken in context to gain an understanding of the organisation's background and its requirements.
- Consider what challenges the organisation is currently facing in terms of their ICT infrastructure and build a project synopsis to solve the issue.

Task Instructions

To complete this assessment, you need to:

- Describe some challenges a typical organisation faces in terms of their ICT infrastructure.
- Provide your proposed solution to one of the challenges you have highlighted in the form of a project synopsis.
- Describe the type of industry placement interview you are anticipating and the organisation's likely expectations.

Reflective Journal Structure

Utilise the following structure for your 1,000-word (+/- 10%) Reflective Journal entry:

- **Introduction - Background information (200 words)**
 - Add to the description of the organisation with which you were placed, the nature of the industry in which it operates and the project/s on which you have been working since starting your industry placement.
- **Interview Preparation (100 words)**
 - Type of industry placement interview you are anticipating.
 - Employer's likely expectations.
- **ICT infrastructure Challenges (200 words)**
 - List down and provide brief analyse on some of the challenges your host organisation is facing in terms of ICT infrastructure.
- **Project Synopsis (500 words)**
 - Provide your proposed solution to one of the challenges in the form of project synopsis. Also justify why the chosen challenge is critical.
 - Briefly outline the motivation, methodology, managerial and technical process plan in your synopsis.
 - List down all the required tools required for the project, also list down the project management tools.
 - List down some ethical issues that you may face for the project.

If any sources are used, you must include in-text citations and references in APA style.

Please refer to the Assessment Rubric for more details.

Tips for Writing Reflective Journal entries

- When writing your reflective journal, the style of writing is more informal, but you should still use full sentences.
- Remember that a reflective journal is a record of your thoughts about your learning during your studies and the WIL placement, so you should describe your experiences of these and provide your analysis and reflection on them.
- Ensure you include any in-text citations and references if you refer to any sources in your reflective journal.

Referencing

It is essential that you use appropriate APA style for citing and referencing research. Please see more information on referencing in the [Academic Skills webpage](#).

Submission Instructions

Submit this task via the Assessment 2 link in the main navigation menu in *ITW601 Information Technology - Work Integrated Learning*. Please save your assessment and submit it as the title of your submission using the following naming convention:

subjcode_Module#_surname_firstname_assessment_title

(e.g. ITW601_M9_Jones_Sarah_A2_Option 2 Industry Placement)

Your Learning Facilitator will provide feedback via the Grade Centre in the LMS portal. Feedback can be viewed in My Grades.

Academic Integrity

All students are responsible for ensuring that all work submitted is their own and is appropriately referenced and academically written according to the [Academic Writing Guide](#). Students also need to have read and be aware of the Torrens University Australia Academic Integrity Policy and Procedure and subsequent penalties for academic misconduct. These are [viewable online](#).

Students also must keep a copy of all submitted material and any assessment drafts.

Special Consideration

To apply for special consideration for a modification to an assessment or exam due to unexpected or extenuating circumstances, please consult the [Assessment Policy for Higher Education Coursework and ELICOS](#) and, if applicable to your circumstance, submit a completed [Application for Assessment Special Consideration Form](#) to your Learning Facilitator.

Assessment Rubric

Assessment Attributes	Fail (Yet to achieve minimum standard) 0-49%	Pass (Functional) 50-64%	Credit (Proficient) 65-74%	Distinction (Advanced) 75-84%	High Distinction (Exceptional) 85-100%
<i>Evaluation and justification of information</i> (20%)	Limited understanding of key concepts required to support discussion. Confuses logic and emotion. Information taken from reliable sources but without a coherent analysis or synthesis. Viewpoints of experts are taken as fact with little questioning.	Resembles a recall or summary of key ideas. Often conflates and/or confuses assertion of personal opinion with information substantiated by evidence from the research and/or subject materials. Analysis and evaluation do not reflect expert judgement, intellectual independence, rigor and adaptability.	Supports personal opinion and information substantiated by evidence from the research and/or subject materials. Demonstrates a capacity to explain and apply relevant concepts. Identifies logical flaws. Questions viewpoints of experts.	Distinguishes between information supported by substantial evidence from the research, the course materials, and extended reading, and assertions of personal opinion. Well-demonstrated capacity to explain and apply relevant concepts. Viewpoint of experts are subject to questioning. Analysis and evaluation reflect	Differentiating between assertions of personal opinion and information supported by solid evidence from the research, the course materials, and extended reading in a systematic and critical manner. Information is taken from sources with a high level of interpretation and/or evaluation to develop a comprehensive critical analysis or synthesis. Identifies gaps in

				growing judgement, intellectual independence, rigor and adaptability.	knowledge. Exhibits intellectual independence, rigor, good judgement and adaptability.
<i>Clarity and presentation of the reflective journal entry</i> (20%)	Reflective journal entry lacked an overall organisation. Reader had to make considerable effort to understand the underlying logic and flow of ideas. Diagrams are absent or inconsistent with the text. Grammatical and spelling errors make it difficult for the reader to interpret the text in places.	Reflective journal entry is organised via topic/flow, but in some areas, it is difficult to follow the flow of ideas. Words can be further improved. Some diagrams are not well explained. Grammatical errors impede the flow of communication.	Reflective journal entry is organised and clearly written for the most part. In some areas, the logic or flow of ideas is difficult to follow. Words are well chosen with some minor improvements needed. Diagrams are consistent with the text. Sentences are mostly grammatically correct and only a few spelling errors are present, but they do not hinder the reader.	Reflective journal entry is well organised and clearly written. Logic or flow of ideas is easy to follow. Words are well chosen. Diagrams are consistent with the text. Sentences are grammatically correct and free from spelling errors.	Reflective journal entry is exceptional. The underlying logic is clearly articulated and easy to follow. Words are chosen that precisely express the intended meaning and support reader comprehension. Diagrams or analyses enhanced and clarified presentation of ideas. Sentences are grammatically correct and free from spelling errors.
<i>High-level problem description</i> (10%)	A high-level project description is missing. The aim of the project is unclear.	A high-level description of the project is missing.
